#### **Life path number 18**

You are attracted to all that is connected with magic, enchantment or something inexplicable. Through the powers of the Moon, you can attract into your life everything you think about. However, you should remember that negative thoughts will materialize along with positive ones. You attract into life what you think about, that's why you need to learn how to control your thoughts so that the result of materialization is for the benefit of you and others.

A passion for magic can lead you into a trap, though. You will begin to go deeper and deeper into magical rituals and witchcraft in order to get some benefits. By doing so, you will provoke your transition to the dark side of the witchcraft. Do not let this happen, because the bright path to the realization of all your goals lies on the surface: if you want to change your life for the better, change your thoughts for the better!

If you develop according to the «plus», you have good intuition, powers of observation, sensitivity and a very rich imagination. However, if you are bored and you have no interest in the real world, you can become lazy and go into an illusory world that you will support with alcohol, drugs, games, etc. Make the real world interesting for yourself, communicate with friends, make new ones, travel to new places and think positively.

(HYPER)

## Psychic abilities

Your psychic abilities are manifested in the fact that you can use your thoughts as a magic wand. They are like a magnet for the Universe, with the help of which you can bring everything into your life. You just need to think about it. But keep in mind that you bring to life exactly what you broadcast. If you are afraid to face some unpleasant situation, then actively thinking about it will lead you right to it. If, despite the difficulties, you think positively and set yourself up for something bright and good, then life, accordingly, presents you with only positive gifts.

You need to understand that your entourage is always watching you — in fact, they are dependent on you. Your strong energy will help you fulfill yourself in any area of life, but it also attracts people who call out to you for everything secret, sacred and magical. Like a magical transmitter, you bring people the possibility of change. Wish everyone only the best, treat yourself and others with kindness. Think more about what you want to bring into your life, rather than about the obstacles. Grow spiritually, expand your knowledge and generously share it with people. If you don't do this, you will close your channel.

In order to develop and fulfill themselves 100%, the strongest magical arcana 15, 16, 17 and 18 must develop in such areas as numerology, astrology, regression, runes, Tarot. Knowing yourself and helping your loved ones and children by guiding them on the right path can become your hobby. But it would be better to make it your professional activity or an additional one. After all, if you close your eyes to your abilities, being a representative of the magical arcana, the Universe will answer you in the same way. It means that the Universe will «close its eyes» to you and, accordingly, will block your energy, and this will negatively affect all spheres of your life: health, relationships, money, conception of a child, etc. This means that a person with the magical arcanum is simply obliged to receive knowledge in the field of numerology, astrology, regression and so on in their life.

Karma is in 3 th and 9th house.

In astrology, the placement of the Moon's Nodes—specifically, the North Node (Rahu) and South Node (Ketu)—are crucial in understanding a person's karmic path, soul purpose, and lessons across lifetimes. If we are talking about the concept of "Karma" in the context of your 3rd and 9th houses, here's a detailed report that outlines the karmic implications associated with these house placements.

## Report on Karma in the 3rd and 9th House in Astrology

### Introduction

In astrology, karma is often linked to the positioning of planets and houses, indicating past actions influencing present life experiences. The 3rd and 9th houses play a crucial role in shaping one's karmic lessons, as they govern communication, learning, belief systems, and destiny.

### Karma in the 3rd House

The 3rd house represents communication, intellect, siblings, short travels, and efforts. When karma is associated with this house, the native may experience the following themes:

1. **Karmic Lessons in Communication** – Past-life actions may have influenced the way a person interacts with others. Misuse of words or deceptive speech in past incarnations could lead to lessons about honesty and clarity in communication.
2. **Challenges with Siblings** – There may be unresolved karmic debts involving siblings or close relatives. This could manifest as either a strong bond or ongoing conflicts that require resolution.
3. **Effort and Persistence** – The 3rd house is linked to determination and self-effort. Individuals may need to work hard in this lifetime to achieve their goals, correcting past laziness or misuse of resources.
4. **Short Travels and Learning** – Experiences related to travel and acquiring new knowledge might be influenced by past-life experiences. The native may have a deep desire to explore various subjects or struggle with education due to previous actions.

### Karma in the 9th House

The 9th house governs higher learning, philosophy, long-distance travel, and spirituality. It reflects one's dharma (life purpose) and connection to universal wisdom. When karma is present in this house, it suggests:

1. **Spiritual Growth and Past Beliefs** – The individual may have been deeply involved in religious or philosophical teachings in a past life. They might have to reconcile past rigid beliefs with newfound wisdom.
2. **Karmic Ties with Teachers and Mentors** – There may be past-life debts involving gurus, teachers, or guides, leading to positive or challenging relationships with mentors in this lifetime.
3. **Travel and Foreign Connections** – The person may feel an unexplainable pull toward distant lands or cultures, potentially tied to past-life experiences in those regions.

4. **Justice and Ethics** – The 9th house is linked to morals and ethical values. If the native misused power or manipulated beliefs in a past life, they may face circumstances that test their integrity in this one.

## Balancing Karma in the 3rd and 9th House

- **Self-Reflection and Learning** – Engaging in honest self-expression and seeking knowledge can help resolve karmic imbalances.
- **Improving Communication** – Practicing truthfulness and clarity in speech can aid in overcoming 3rd-house karmic issues.
- **Embracing Open-Mindedness** – Being open to new philosophies and spiritual insights will help balance 9th-house karma.
- **Resolving Past Conflicts** – Healing relationships with siblings and mentors can free the native from karmic burdens.

Karma in the 3rd and 9th houses highlights lessons related to communication, learning, beliefs, and ethical values. By understanding these influences, individuals can work toward spiritual growth and personal evolution.
